HEALTH HAZARD INFORMATION

Health Effects

Acute - Swallowed Minor amounts ingested incidental to normal handling will have little or no effect. Larger amounts deliberately ingested will cause nausea vomiting and stomach discomfort.

Acute - Eye May cause moderate eye irritation and must be removed by flushing with water.

Acute - Skin May cause minor irritation and should be removed by washing with soap and water.

Acute - Inhaled Irritating to nose, throat and respiratory system.

First Aid

Swallowed Wash mouth and lips with water. Do not induce vomiting. Give water or milk to drink to dilute stomach contents. If symptoms persist, seek medical assistance.

Eye Immediately irrigate with copious quantity of water or saline eyewash for at least 15 minutes with the eyelids held open. In all cases of eye contamination, it is a sensible precaution to seek medical advice if irritation and discomfort persist. Continue to irrigate the eye with clean water or saline solution while transporting to medical facility.

Skin Wash with plenty of soap and water. Remove contaminated clothing and wash before re-use. Apply a skin moisturizer.

Inhaled Carefully remove persons to fresh air. If patient is severely affected, obtain medical assistance. If the person stops breathing, apply artificial respiration and other first aid techniques as required until medical assistance is obtained.

First Aid Facilities Eye wash fountains should be easily accessible.
